Mr. Christian was elected the second time on the tariff question. His national executive committee argued Dismocrate throughout the country to make that the level and to adold a distinguish of the country to make that the level and to adold a distinguish of the country to make that the level and to adold a distinguish of the country to the country that the level and the country that the level and the country that the country th

SIZMMARY.

first month after the sale of the homes for gold, about \$20,000,000 of gold was raken from the United States to for-eign reduction, this veriging the statements, made before that time that the gold obtained by the sale of bonds would not roundly in the treasure, but would place Ground I in the sale.

would pass through it as through a sirve into foreign hands Taxes Paid the Government.

Taxes Paid the Government.

Mr. Chrestand and those who agree with him ampear to believe that the treasury of the United mates should be conducted on the principle that they must have a gold reserve sufficient to cover and ascure all outstanding currency. They consider the for he processary in other to keep the 16 he processary in other to keep the 16 he principle of the cover errificates and all the aliver in the brassary at par with gold. They have changed silver from standard redeming moosy to the condition of currency to be extremed with gold, the paper. They seem not able to comprehend that while the government collects as tayes in one way or another, armually between four numbered and the hundred millions of dollars, that the forty-four staires and the text-to-the collect many millions of dollars annually is taxes, that country with millions of dollars around millions of dollars and using systems.

notes of the government answer all of the purpose of gold in the payment of these taxes. They seem mempable of realizing that the government unites are lawful tender for all delta, public and private, unless otherwise provided

Cannot Fulley Cleveland.

States dangerously paternalistic, and atterty impracticable. On these they cannot agree. I refer to this advocacy of the leaus of money by the government to be loaned to the people on land inortanges and on the deposit of farm products in public warehouses, and their proposal that the government shall bely and own the railroads, interruphs and delight the constitution of the Gravestan of the constitution of the United States per-lately mover contemplated that the United States should become a leabler of money for private uses or a broker.

Should Not Issue Bonds. To buy them with government makes would reader the manage worthless. And requires with no doubt agree with all others that the government should not leave braids to pay for them. And these properties exame be bought except up a terms acceptable to the owners of them. They should be required and controlled by law, but not twent by the government. And there is not the most remain possibility that any engrees will ever be induced, to consider the proposition for the save ernment to purchase them. This part of the policy of the Fuguistic may, therefore be dismissed as utterly impracticable.

The ladier by which it is proposed for the government to take cars of the isouth by auptying them with money, would tend to create a pace of unusually dependents, while our theory of government is that the people should support the government which protects them, and should support them, and should support them, and should support them, and thus make a ran of aturity, independent freewest.

propic, there can do much to that end by abindoning what is wrong and impracticable in their platform and by untiling with the Democrate on the policies on which they agree and in that way positing forward to success great measures which are printleable. They might well do this as there are many times as many Democrats with whom they agree on these practicable questions as there are Populate. One of the talongs which has kept the Reinstlicans in power so long, while they were inflicting lajury on the minury by their pollutes, has been that whenever pushes updison has revolted at their about of power, instead of those who condemned such actions that warming with the Democrary to so ourse thair overthrow, they have sought in accompilab that by the formation of new melling with the Democrary to so ourse thair overthrow, they have sought in accompilab that by the formation of new melling artists. there justices that or the formation of there justices many such par-ties have been formed in the last twen-ty-five years, each to its furn to make large pretensions and then to puse into outlivion.

advice to ignore these questions, this would simply be a surrender of our iscaple to the moiser chase, which is now doing so much to sucrifice the locations of the people.

We creat to currendes to make this issue in all our primaries and conventions, so that no one shall misunderstand our domands, or hereafter misrepresent our interests.

If we would be faithful to our country we cannot affers to decrive our sulves or he decrived on these greations.
